

A home  
savings  
plan that  
works  
for you

## Make the small change that builds to something big

Get into your own home – with a little help. The journey towards owning your first home can feel like a long, daunting road, but with some small, simple changes to your spending habits, you may get there sooner than you ever expected.

My Home Plan lets us work together to develop a unique plan that's built around your lifestyle. It's a savings plan that's achievable, easy to track, and built around your real life – so you'll be in the best position to meet your goals.

## What is My Home Plan?

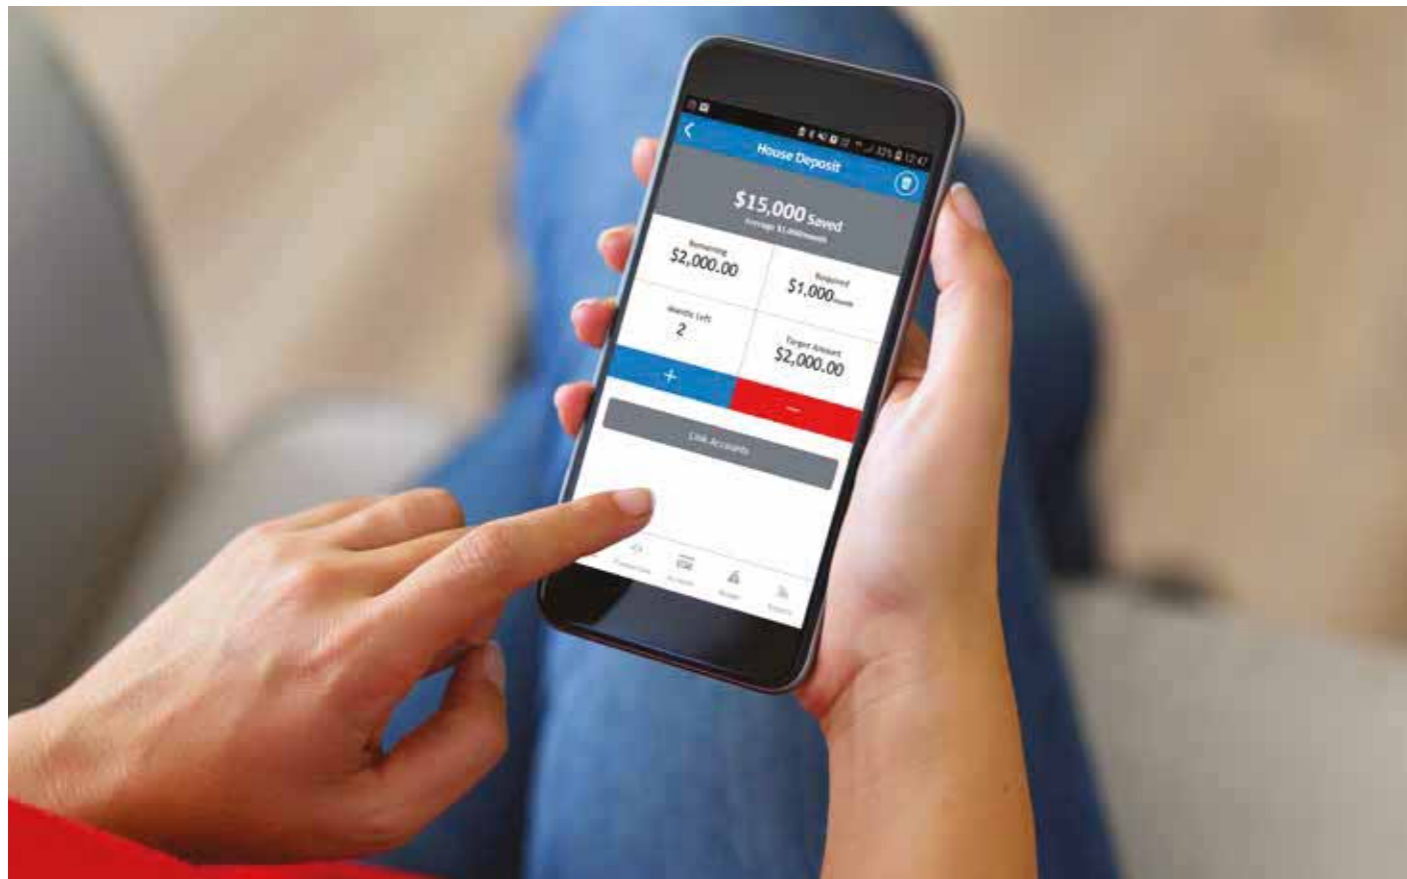

My Home Plan gives you a tailored framework for saving the small change that will build to something bigger. Together, we'll develop a plan built around your financial situation and real-world expenses, and with the ongoing help of your dedicated Finance Coach, you'll be supported to stick to it, every step of the way.

With access to our easy to use mobile app and online platform, you can view your money, track your goals and monitor your spending, saving and debt reduction strategies, anywhere, any time – all in one spot!

You'll partner with a personal Finance Coach, who will guide you through your savings journey with the support and motivation you need to see you to achieve your goals and build a home of your own – faster.

## How it works

## My Home Plan Technology

As you move through your My Home Plan journey, tracking and managing your progress is easy. With the help of our website and mobile app, you can set your savings goals and check in on how you're going, from anywhere, at any time.

The My Home Plan technology integrates your bank account information so that you can view all your finances in one place. Track where your money is going, analyse how much you are saving and view how close to your milestones you are at any given time. Your Finance Coach will also have their own accessible dashboard, where they too can check in on how your savings are progressing, support you with helpful tips, or coach you through small changes to lifestyle habits if you need a bit of help to stay on track.

Whether accessing it all via our online version, or through the downloadable app, the platform has been built with you in mind, and couldn't be easier to navigate.

## Frequently Asked Questions

### Can anyone join My Home Plan?

Anyone can apply, but we want to make sure you can achieve your financial goals – so our Finance Coaches will analyse your current situation and assess your eligibility.

### Do you guarantee I will be able to afford my own home if I join?

With bank policy constantly changing, we can't make guarantees – but we wouldn't sign you up to the program if we didn't think you could achieve your goals. Rest assured, we're here to coach you along the way, and help ensure your targets are always in sight.

### My situation has changed – what does that mean for me?

We understand that life can get in the way. From surprise income boosts, such as promotions or bonuses, to unfortunate bumps in the road like unexpected bills, situations change that can impact your journey. But the tailored, personalised nature of our program lets us re-assess your new situation and adjust plans to fit.

### Are there any incentives involved with the program?

Incentives, such as prestart vouchers, new appliances or feature upgrades, may be offered if you intend to build with one of our My Home Plan builder partners, and vary on your chosen builder.

### Do I have to build a home to have access to the program?

While we think it's a great opportunity to take advantage of some great incentives through our builder partners, we are more than happy to accept customers on the program who want to purchase an existing home!
