Re: Mode – Cannington

To Whom it May Concern

The Fini Developments team appointed the Dale Alcock Projects team as builder for our medium density project Mode Cannington. Mode consists of 15 two storey townhouses and 5 apartments over three levels. Two apartments were delivered as NDIS accommodation to meet the market in the local area.

After conducting a closed tender we appointed Dale Alcock Projects as our preferred builder. We made the decision to engage Dale Alcock Projects in a cost plus contract to achieve our desired outcomes of cost savings from collaboration with the builder throughout the construction process.

During the construction of Mode the Fini Developments team found the Dale Alcock Projects team to be professional, responsive and passionate about the outcomes of our project.

Upon completion of the project we were pleased with the quality of construction and the professionalism of the defects and handover process the Dale Alcock Projects team conducted. I would strongly recommend Dale Alcock Projects to developers who are considering projects of similar nature to Mode. Our team is currently talking to the Dale Alcock Projects team about future projects in our pipeline.

Anthony Chun
Director
